PULY CAFF[®] Plus NSF Powder and Tabs

SPECIAL CLEANER FOR COFFEE MACHINES AND CUPS

Composition submitted to the Ministry of Health and Environment – PROFESSIONAL USE

...more than just cleaning!

FEATURES: PULY CAFF Plus NSF Powder and Tabs was the first cleaner specifically designed in our Special Applications Research Centre, to service the brewing unit (shower, filter, filter holder) and the back-flush valve of espresso coffee machines. It improve deodorizing and clean without increasing the extraction of toxic metals from common materials of fabrication in espresso machines when used and rinsed according to the manufacturer's instructions (**Tested and Certified by N.S.F. International - Protocol P152 Health Effects and Corrosivity of Commercial Espresso Machine Chemical Cleaner**). It is also unique for soaking cups, teapots, etc.: it cleans and eliminates all traces of coffee, tea or milk from crockery without affecting decorations in any way.

DIRECTIONS FOR USE: Complete cleaning of the brewing filter, filter holder and back-flush valve unit: a) place a rubber disk in the filter holder; b) use the normal coffee filter with micro-holes and add 1 spoonful (about 10g or 1-2 tabs) of **PULY CAFF Plus NSF**; c) start brewing cycle and wait for at least 25/30 seconds and then drain off the water and rinse thoroughly until the water drained is clean. **Cleaning of the shower filter and back-flush valve unit only:** a) replace the filter with holes with the blind one provided; b) add 1 spoonful (about 10g or 1-2 tabs) of **PULY CAFF Plus NSF**; c) start brewing cycle and wait for at least 25/30 seconds and then drain off the water and rinse thoroughly until the water drained is clean. **Manual cleaning of the brewing filters, filter holder and crockery:** prepare a solution of 4 spoonfuls (about 40g or 4-8 tabs) of **PULY CAFF Plus NSF** for every litre of very hot water, using plastic, stainless steel or glass containers; leave the items to soak completely for at least one hour (or overnight) and then rinse thoroughly in running water. **PULY CAFF Plus NSF** is fully effective in eliminating coffee, tea or milk stains and traces of lipstick from the cups and crockery, leaving them perfectly shiny and without any smell.

FREQUENCY OF USE: PULY CAFF Plus NSF is generally used every 500 cups of coffee as far as unit maintenance is concerned and weekly to keep the crockery clean and bright. We anyway advise preventive measures to protect the equipment from irreversible damage and to get the most out of your blend of coffee. **Remember that a dirty brewing unit does not get the best out of the blend and the coffee will be watery and have a characteristic burnt taste.**

SELF CHECK: Inspect the result. Check that it smells right. If necessary, repeat the washing operation.

CRITICAL POINTS: Check that the filter and the seal with underpan filter are whole, and if necessary replace with new spare parts. Check that the dripping pan drain is not clogged so that the **PULY CAFF Plus NSF** reaction foam can flow out freely.

DATA AND SAFETY: See the **SAFETY SHEET**. During washing, be careful of splashes of boiling water; use protective garments (gloves etc.).

PACKAGES:

Puly Caff Plus NSF Powder

32oz.-900g pot (flapper dose cap)	12 pots per case
20oz.-570g pot (flapper dose cap)	12 pots per case
13oz.-370g pot (flapper dose cap)	12 pots per case
20g 10 sachets in box	24 boxes per case

Puly Caff Plus NSF Tabs

Ø16 mm. 2,5g - 60 tabs pot	24 pots per case
Ø10 mm. 1g - 100 tabs pot	24 pots per case
